

Product Design Spec - e2e-smoke

Version 1.0.0 - generated 2026-09-26T22:32:04.200442

Features

Feature	Priority	Status	Description
Task fields used in scoring	medium	planned	due date/time, if present, must parse as a valid instant; importance must be within its defined scale; estimated effort must be > 0 when provided.
**US-31	medium	planned	** As a busy professional, I want to start a focus session on a task so that I work on it without distraction.
**US-32	medium	planned	** As a busy professional, I want to choose how long a session lasts so that it fits my available time.
**US-33	medium	planned	** As a busy professional, I want to pause and resume so that short interruptions do not break my session.
**US-34	medium	planned	** As a busy professional, I want repeating work/break cycles so that I maintain sustainable attention.
**US-35	medium	planned	** As a busy professional, I want the app to stop distracting me during focus so that I stay on task.
**US-36	medium	planned	** As a busy professional, I want my focus time recorded against the task so that my history reflects real effort.
**US-37	medium	planned	** As a busy professional, I want a prompt when the timer ends so that I know to stop or continue.
**US-38	medium	planned	** As a busy professional, I want to queue the next task so that I flow from one session to the next.
**US-39	medium	planned	** As a busy professional, I want optional ambient sound so that I can mask background noise.
**US-40	medium	planned	** As a busy professional, I want to see my focus statistics so that I can understand my habits.
**US-41	medium	planned	** As a busy professional, I want a daily focus goal so that I stay accountable.
**US-42	medium	planned	** As a busy professional, I want my session to survive a restart so that I do not lose my progress.
**US-43	medium	planned	** As a busy professional, I want to correct recorded time so that the history is accurate.
**US-44	medium	planned	** As a busy professional, I want to switch the task mid-session so that unplanned work is still tracked.
**US-45	medium	planned	** As a keyboard-first user, I want shortcuts for all timer controls so that I never leave the keyboard.
**BR-1	medium	planned	** A focus session must always reference exactly one linked task at any instant; task reassignment is recorded as a segment boundary.
**BR-6	medium	planned	** A session record is immutable once written, except for the note and the manual correction permitted by FR-70, which is stored as an adjustment rather than an overwrite.
**EC-3	medium	planned	** A session spans midnight → the record keeps its true start/end timestamps; statistics attribute focus time to the calendar day in which the time was actually spent.
Every metric is computed from the same underlying event records	medium	planned	task creation, completion, due-date mutation (reschedule), and focus-session start/end (F-3). Metrics are read-only views; this feature never mutates task or session data.
EC-9 — Comparison window partially outside retention	medium	planned	deltas are suppressed and labeled "insufficient history" rather than computed from partial data (FR-93).

| ****US-61**** — As a busy professional, I want to connect my calendar so that deadline-bearing events appear as tasks automatically. | medium | planned | ****US-61**** — As a busy professional, I want to connect my calendar so that deadline-bearing events appear as tasks automatically. |

| ****US-62**** — As a busy professional, I want to connect my issue tracker and email inbox so that assignments become tasks without retyping. | medium | planned | ****US-62**** — As a busy professional, I want to connect my issue tracker and email inbox so that assignments become tasks without retyping. |

| ****US-63**** — As a user, I want to choose which calendars, lists, and projects sync so that I am not flooded with irrelevant tasks. | medium | planned | ****US-63**** — As a user, I want to choose which calendars, lists, and projects sync so that I am not flooded with irrelevant tasks. |

| ****US-64**** — As a user, I want to control which fields sync and in which direction so that my data stays consistent with the tool I actually work in. | medium | planned | ****US-64**** — As a user, I want to control which fields sync and in which direction so that my data stays consistent with the tool I actually work in. |

| ****US-65**** — As a user, I want conflicting edits resolved by my chosen rule so that I do not have to referee every change. | medium | planned | ****US-65**** — As a user, I want conflicting edits resolved by my chosen rule so that I do not have to referee every change. |

| ****US-66**** — As a user, I want a conflict inbox where I can resolve ambiguous cases myself so that nothing is silently overwritten. | medium | planned | ****US-66**** — As a user, I want a conflict inbox where I can resolve ambiguous cases myself so that nothing is silently overwritten. |

| ****US-67**** — As a user, I want to trigger a sync on demand and watch its progress so that I know exactly when my data is current. | medium | planned | ****US-67**** — As a user, I want to trigger a sync on demand and watch its progress so that I know exactly when my data is current. |

| ****US-68**** — As a user, I want an activity log of every synced change so that I can audit what happened and why. | medium | planned | ****US-68**** — As a user, I want an activity log of every synced change so that I can audit what happened and why. |

| ****US-69**** — As a user, I want to be told when a connection breaks or expires so that I can restore it before my task list goes stale. | medium | planned | ****US-69**** — As a user, I want to be told when a connection breaks or expires so that I can restore it before my task list goes stale. |

| ****US-70**** — As a user, I want to pause a connection temporarily without losing its configuration so that I can silence a noisy source and re-enable it later. | medium | planned | ****US-70**** — As a user, I want to pause a connection temporarily without losing its configuration so that I can silence a noisy source and re-enable it later. |

| ****US-71**** — As a user, I want to disconnect an account and have its access revoked so that I stay in control of my data. | medium | planned | ****US-71**** — As a user, I want to disconnect an account and have its access revoked so that I stay in control of my data. |

| ****US-72**** — As a user, I want to connect two accounts of the same provider | medium | planned | ****US-72**** — As a user, I want to connect two accounts of the same provider |

| ****US-73**** — As a user, I want imported deadlines to influence my priority queue exactly like native deadlines so that my "Today" list is trustworthy. | medium | planned | ****US-73**** — As a user, I want imported deadlines to influence my priority queue exactly like native deadlines so that my "Today" list is trustworthy. |

| ****US-74**** — As a user, I want to open the original external item from a task so that I can act on it in its own context. | medium | planned | ****US-74**** — As a user, I want to open the original external item from a task so that I can act on it in its own context. |

| ****US-75**** — As a user, I want tasks created by quick add | medium | planned | ****US-75**** — As a user, I want tasks created by quick add |

| ****BR-7**** — Sync never overwrites user-authored content with an empty external value; an omitted external field is treated as "no change", not as a deletion, unless the mapping explicitly declares "external authoritative for this field". | medium | planned | ****BR-7**** — Sync never overwrites user-authored content with an empty external value; an omitted external field is treated as "no change", not as a deletion, unless the mapping explicitly declares "external authoritative for this field". |

| ****BR-13** | medium | planned | ****BR-13** |

| ****EC-2**** — The external item has a date-only due value; it must not shift to the previous or next day when rendered | medium | planned | ****EC-2**** — The external item has a date-only due value; it must not shift to the previous or next day when rendered |

| ****AC-12**** — Given an imported task with an external due date, when the prioritization queue is computed, then that deadline affects the ranking exactly as a native due date would. | medium | planned | ****AC-12**** — Given an imported task with an external due date, when the prioritization queue is computed, then that deadline affects the ranking exactly as a native due date would. |

| ****BR-1** — One preference.****** Exactly one preference value is active per device | medium | planned | `light`, `dark`, or `system`. Custom colour pickers, per-screen themes, and per-project themes are out of scope for this feature. |

| ****BR-2** — Precedence is fixed.****** The chain in Behaviour §1 is the only permitted resolution order. No feature may inject a theme value outside it. | medium | planned | ****BR-2** — Precedence is fixed.****** The chain in Behaviour §1 is the only permitted resolution order. No feature may inject a theme value outside it. |

| ****BR-3** — Toggle during a scheduled window.****** An explicit toggle while a schedule window is active is treated as a session-scoped temporary override. It does not delete or edit the schedule, and it is cleared at the next window boundary or at the start of the next session. | medium | planned | ****BR-3** — Toggle during a scheduled window.****** An explicit toggle while a schedule window is active is treated as a session-scoped temporary override. It does not delete or edit the schedule, and it is cleared at the next window boundary or at the start of the next session. |

| ****BR-9** — Tokens are the only colour source.****** Feature components reference semantic tokens. A raw colour literal in a feature component is a defect, not a stylistic choice | medium | planned | ****BR-9** — Tokens are the only colour source.****** Feature components reference semantic tokens. A raw colour literal in a feature component is a defect, not a stylistic choice |

| ****Sync failure or conflict.**** The device-local preference is authoritative for that device. Sync errors surface as a passive status item, never as a blocking modal, and never revert the on-screen theme. | medium | planned | ****Sync failure or conflict.**** The device-local preference is authoritative for that device. Sync errors surface as a passive status item, never as a blocking modal, and never revert the on-screen theme. |

| ****API-5** — Non-interference.****** No other endpoint's behaviour depends on the theme. No request from F-1..F-5 may be rejected, delayed, or altered because of a theme value, and theme state is never a prerequisite for another feature's API call. | medium | planned | ****API-5** — Non-interference.****** No other endpoint's behaviour depends on the theme. No request from F-1..F-5 may be rejected, delayed, or altered because of a theme value, and theme state is never a prerequisite for another feature's API call. |

| ****OQ-2.**** Does "Dark Mode" cover the product's public marketing/help surfaces, or only the authenticated application? This section assumes the authenticated application plus outbound notifications | medium | planned | ****OQ-2.**** Does "Dark Mode" cover the product's public marketing/help surfaces, or only the authenticated application? This section assumes the authenticated application plus outbound notifications |

| As a busy professional, I want my active tasks ranked for me automatically, so that I always know what to do next without manually sorting. | medium | planned | As a busy professional, I want my active tasks ranked for me automatically, so that I always know what to do next without manually sorting. |

| Acceptance Criteria | medium | planned | Every active task has a numeric priority score (FR-1); the "Today" queue is sorted by descending score (FR-2); the order is stable across reloads when inputs are unchanged. |

| As a user with mixed deadlines, I want ranking to consider due dates, importance, effort, age, and dependencies, so that the order reflects real-world urgency. | medium | planned | As a user with mixed deadlines, I want ranking to consider due dates, importance, effort, age, and dependencies, so that the order reflects real-world urgency. |

| As a skeptical user, I want a plain-language explanation per task, so that I can trust the automatic ordering. | medium | planned | As a skeptical user, I want a plain-language explanation per task, so that I can trust the automatic ordering. |

| As a user who values deadlines over effort, I want to adjust factor weights, so that ranking matches how I actually work. | medium | planned | As a user who values deadlines over effort, I want to adjust factor weights, so that ranking matches how I actually work. |

| As a user, I want to pin a task to the top, so that the system does not hide something I must do now. | medium | planned | As a user, I want to pin a task to the top, so that the system does not hide something I must do now. |

| As a user, I want an override to expire, so that I do not leave stale pins that distort my queue forever. | medium | planned | As a user, I want an override to expire, so that I do not leave stale pins that distort my queue forever. |

| As a user with a hard deadline, I want urgent tasks to rise as the deadline approaches, so that I don't miss commitments. | medium | planned | As a user with a hard deadline, I want urgent tasks to rise as the deadline approaches, so that I don't miss commitments. |

| As a user, I want a task blocked by an unfinished dependency to rank below its blocker, so that I don't start work I can't finish. | medium | planned | As a user, I want a task blocked by an unfinished dependency to rank below its blocker, so that I don't start work I can't finish. |

| As a new user, I want a helpful prompt when nothing is active, so that I am not confused by a blank screen. | medium | planned | As a new user, I want a helpful prompt when nothing is active, so that I am not confused by a blank screen. |

| As a heavy user, I want the queue to load and reorder quickly, so that prioritization never slows me down. | medium | planned | As a heavy user, I want the queue to load and reorder quickly, so that prioritization never slows me down. |

| As a keyboard user, I want to navigate and pin/unpin without a mouse, so that I can work efficiently. | medium | planned | As a keyboard user, I want to navigate and pin/unpin without a mouse, so that I can work efficiently. |

| As a user with a fleeting thought, I want to add a task by typing one line and pressing Enter, so that capture never interrupts my flow. | medium | planned | As a user with a fleeting thought, I want to add a task by typing one line and pressing Enter, so that capture never interrupts my flow. |

| As a user, I want to type "tomorrow 5pm" and have it understood, so that I don't open a date picker. | medium | planned | As a user, I want to type "tomorrow 5pm" and have it understood, so that I don't open a date picker. |

| As a user, I want to type "!!" or "urgent" to flag importance, so that the task feeds prioritization correctly. | medium | planned | As a user, I want to type "!!" or "urgent" to flag importance, so that the task feeds prioritization correctly. |

| As a user, I want to type "#work" and "@home", so that tasks are organized as I capture them. | medium | planned | As a user, I want to type "#work" and "@home", so that tasks are organized as I capture them. |

| As a cautious user, I want to see how my line will be interpreted before I commit, so that I can catch mistakes. | medium | planned | As a cautious user, I want to see how my line will be interpreted before I commit, so that I can catch mistakes. |

| As a user, I want to edit a parsed field in place, so that a wrong interpretation does not become a wrong task. | medium | planned | As a user, I want to edit a parsed field in place, so that a wrong interpretation does not become a wrong task. |

| As a user typing something unusual, I want the whole line kept as the title if nothing parses, so that I never lose input. | medium | planned | As a user typing something unusual, I want the whole line kept as the title if nothing parses, so that I never lose input. |

| As a user, I want ambiguous phrases handled consistently, so that behavior is learnable. | medium | planned | As a user, I want ambiguous phrases handled consistently, so that behavior is learnable. |

| As a user, I want to undo a just-created task, so that a slip does not clutter my list. | medium | planned | As a user, I want to undo a just-created task, so that a slip does not clutter my list. |

| As a traveler, I want parsed times interpreted in my current timezone, so that "5pm" means 5pm where I am. | medium | planned | As a traveler, I want parsed times interpreted in my current timezone, so that "5pm" means 5pm where I am. |

| As a user on a flaky connection, I want quick add to work offline, so that capture is never blocked. | medium | planned | As a user on a flaky connection, I want quick add to work offline, so that capture is never blocked. |

| As a user, I want a warning when I add a near-identical open task, so that I don't create clutter. | medium | planned | As a user, I want a warning when I add a near-identical open task, so that I don't create clutter. |

| As a keyboard user, I want to open, preview, and confirm quick add without a mouse, so that capture stays fast. | medium | planned | As a keyboard user, I want to open, preview, and confirm quick add without a mouse, so that capture stays fast. |

| As a user, I want to begin a focus session from a task, so that I commit a block of time to it. | medium | planned | As a user, I want to begin a focus session from a task, so that I commit a block of time to it. |

| As a user, I want a default session length I can rely on, so that starting focus requires no setup. | medium | planned | As a user, I want a default session length I can rely on, so that starting focus requires no setup. |

| As a user with a longer task, I want to set a custom length, so that the timer matches my work. | medium | planned | As a user with a longer task, I want to set a custom length, so that the timer matches my work. |

| Acceptance Criteria | medium | planned | Custom durations within the supported range (per feature validation V-1 in this feature file) are accepted before or during a session (FR-53). |

| As a user, I want to pause, resume, extend, and end, so that the session fits reality. | medium | planned | As a user, I want to pause, resume, extend, and end, so that the session fits reality. |

| As a user, I want clear handling when a session is already active, so that my time records stay accurate. | medium | planned | As a user, I want clear handling when a session is already active, so that my time records stay accurate. |

| Acceptance Criteria | medium | planned | Starting a new session while one is active forces an explicit decision (per business rule BR-3 in this feature file) (FR-55). |

| As a user, I want an unambiguous on-screen timer, so that I know how long remains. | medium | planned | As a user, I want an unambiguous on-screen timer, so that I know how long remains. |

| As a user, I want a distraction-free surface during focus, so that I stay on one task. | medium | planned | As a user, I want a distraction-free surface during focus, so that I stay on one task. |

| As a user, I want a clear end-of-session signal, so that I can transition deliberately. | medium | planned | As a user, I want a clear end-of-session signal, so that I can transition deliberately. |

| As a user, I want focus time attributed to the task, so that my history reflects the effort. | medium | planned | As a user, I want focus time attributed to the task, so that my history reflects the effort. |

| Acceptance Criteria | medium | planned | Completed (and per policy, paused/ended) sessions record focused duration against the task (FR-56 onward in this feature file). |

| As a user, I want to stop before time is up, so that an interrupted block is not lost. | medium | planned | As a user, I want to stop before time is up, so that an interrupted block is not lost. |

| As a user, I want the timer to stay correct if I switch tabs, so that the app doesn't drift. | medium | planned | As a user, I want the timer to stay correct if I switch tabs, so that the app doesn't drift. |

| As a user whose app closed mid-session, I want a sane recovery, so that nothing is silently lost. | medium | planned | As a user whose app closed mid-session, I want a sane recovery, so that nothing is silently lost. |

| As a user, I want to see past sessions, so that I can understand my patterns. | medium | planned | As a user, I want to see past sessions, so that I can understand my patterns. |

| As a user relying on assistive tech, I want the timer and controls accessible, so that I can use focus mode fully. | medium | planned | As a user relying on assistive tech, I want the timer and controls accessible, so that I can use focus mode fully. |

| As a user, I want a dedicated Progress view, so that I can review how I am doing in one place. | medium | planned | As a user, I want a dedicated Progress view, so that I can review how I am doing in one place. |

| As a user, I want to see completed, created, and net change, so that I understand my throughput. | medium | planned | As a user, I want to see completed, created, and net change, so that I understand

my throughput. |

| As a user, I want completion rate plotted over time, so that I can spot trends. | medium | planned | As a user, I want completion rate plotted over time, so that I can spot trends. |

| Acceptance Criteria | medium | planned | Completion rate (completed ÷ created, as a percentage) is plotted at a granularity implied by the period (FR-78). |

| As a user, I want to see tasks completed per day/week/month, so that I can gauge capacity. | medium | planned | As a user, I want to see tasks completed per day/week/month, so that I can gauge capacity. |

| As a user motivated by streaks, I want current and longest streak shown, so that I stay consistent. | medium | planned | As a user motivated by streaks, I want current and longest streak shown, so that I stay consistent. |

| As a user, I want to change the time window, so that I can look at a week, month, or year. | medium | planned | As a user, I want to change the time window, so that I can look at a week, month, or year. |

| As a user, I want exact values on demand, so that a chart is not the only source of truth. | medium | planned | As a user, I want exact values on demand, so that a chart is not the only source of truth. |

| As a new user, I want guidance when there is no data yet, so that I don't think analytics are broken. | medium | planned | As a new user, I want guidance when there is no data yet, so that I don't think analytics are broken. |

| As a screen-reader user, I want the metrics available as text, so that charts are not a barrier. | medium | planned | As a screen-reader user, I want the metrics available as text, so that charts are not a barrier. |

| Acceptance Criteria | medium | planned | Every chart has a textual or table equivalent carrying the same values. |

| As a user, I want my analytics to respect my timezone, so that "today" means my today. | medium | planned | As a user, I want my analytics to respect my timezone, so that "today" means my today. |

| As a user, I want metrics to reflect recent activity, so that the view is trustworthy. | medium | planned | As a user, I want metrics to reflect recent activity, so that the view is trustworthy. |

| As a user, I want to export my metrics, so that I can keep or share a record. | medium | planned | As a user, I want to export my metrics, so that I can keep or share a record. |

| As an individual user, I want my progress to be visible only to me, so that personal data stays personal. | medium | planned | As an individual user, I want my progress to be visible only to me, so that personal data stays personal. |

| As a user, I want a catalogue of source types, so that I know what is possible before committing. | medium | planned | As a user, I want a catalogue of source types, so that I know what is possible before committing. |

| As a user, I want to authorize a provider without typing my password into the app, so that my credentials stay safe. | medium | planned | As a user, I want to authorize a provider without typing my password into the app, so that my credentials stay safe. |

| As a user, I want to see and control my connections, so that I stay in charge of what is linked. | medium | planned | As a user, I want to see and control my connections, so that I stay in charge of what is linked. |

| As a user with several accounts, I want to rename them, so that I can tell them apart. | medium | planned | As a user with several accounts, I want to rename them, so that I can tell them apart. |

| As a user, I want to pause a connection, so that I can stop data flow without disconnecting. | medium | planned | As a user, I want to pause a connection, so that I can stop data flow without disconnecting. |

| As a user whose token expired, I want a clear reconnect path, so that syncing resumes with minimal effort. | medium | planned | As a user whose token expired, I want a clear reconnect path, so that syncing resumes with minimal effort. |

| As a user, I want to disconnect, so that no further data is read or written. | medium | planned | As a user, I want to disconnect, so that no further data is read or written. |

| As a user, I want last-sync time and state visible, so that I can tell whether data is current. | medium | planned | As a user, I want last-sync time and state visible, so that I can tell whether data is current. |

| As a user, I want plain-language errors, so that I know whether to retry or reconnect. | medium | planned | As a user, I want plain-language errors, so that I know whether to retry or reconnect. |

| As a user, I want items from a connected source to become tasks, so that my external work appears in one place. | medium | planned | As a user, I want items from a connected source to become tasks, so that my external work appears in one place. |

| As a user, I want supported changes to sync outward, so that I don't maintain two systems. | medium | planned | As a user, I want supported changes to sync outward, so that I don't maintain two systems. |

| As a user with two-way sync, I want conflicts handled by a clear rule, so that data doesn't silently diverge. | medium | planned | As a user with two-way sync, I want conflicts handled by a clear rule, so that data doesn't silently diverge. |

| As a security-conscious user, I want tokens stored and handled securely, so that a breach doesn't expose my accounts. | medium | planned | As a security-conscious user, I want tokens stored and handled securely, so that a breach doesn't expose my accounts. |

| As a user with assistive tech, I want the connection list and its actions accessible, so that I can manage integrations. | medium | planned | As a user with assistive tech, I want the connection list and its actions accessible, so that I can manage integrations. |

| As a user, I want to choose light, dark, or system, so that the app suits my environment. | medium | planned | As a user, I want to choose light, dark, or system, so that the app suits my environment. |

| As a user, I want the app to follow my OS theme, so that it matches everything else on my device. | medium | planned | As a user, I want the app to follow my OS theme, so that it matches everything else on my device. |

| As a user, I want my preference remembered, so that I don't re-select it every session. | medium | planned | As a user, I want my preference remembered, so that I don't re-select it every session. |

| As a user, I want switching to be immediate, so that nothing looks half-updated. | medium | planned | As a user, I want switching to be immediate, so that nothing looks half-updated. |

| As a user, I want no bright flash on load in dark mode, so that the app doesn't dazzle me. | medium | planned | As a user, I want no bright flash on load in dark mode, so that the app doesn't dazzle me. |

| As a user, I want sufficient contrast in either theme, so that content stays legible. | medium | planned | As a user, I want sufficient contrast in either theme, so that content stays legible. |

| As a user, I want visuals tuned per theme, so that nothing becomes unreadable or jarring. | medium | planned | As a user, I want visuals tuned per theme, so that nothing becomes unreadable or jarring. |

| As a user printing a page, I want legible output regardless of theme, so that documents are usable. | medium | planned | As a user printing a page, I want legible output regardless of theme, so that documents are usable. |

| As a signed-in user, I want my theme to follow me, so that each device feels consistent. | medium | planned | As a signed-in user, I want my theme to follow me, so that each device feels consistent. |

| As a user, I want error, empty, and loading states themed too, so that nothing breaks the look. | medium | planned | As a user, I want error, empty, and loading states themed too, so that nothing breaks the look. |

| ****Inbound ingestion never validates synchronously.**** API-35 acknowledges delivery and defers interpretation, so a malformed payload surfaces as a `failed`/`partial` run in API-34 instead of a provider-visible error that would trigger duplicate retries. | medium | planned | ****Inbound ingestion never validates synchronously.**** API-35 acknowledges delivery and defers interpretation, so a malformed payload surfaces as a `failed`/`partial` run in API-34 instead of a provider-visible error that would trigger duplicate retries. |

| ****Theming wraps everything.**** `ThemeProvider` | medium | planned | ****Theming wraps everything.**** `ThemeProvider` |

Source stages: design
