

Features — design (stage 1)

- [F-1: `add` command entry point](F-1-functional.md) — **Feature ID:** F-1
- [F-2: Two positional integer operands](F-2-functional.md) — **Feature ID:** F-2
- [F-3: Integer addition](F-3-functional.md) — **Feature ID:** F-3
- [F-4: Print result to stdout](F-4-functional.md) — **Feature ID:** F-4
- [F-5: Exit-status contract](F-5-functional.md) — **Feature ID:** F-5
- [F-6: Input validation and error message](F-6-functional.md) — **Feature ID:** F-6
- [F-7: Standard library only](F-7-functional.md) — **Feature ID:** F-7
- [F-8: Correct handling of negative results](F-8-functional.md) — **Feature ID:** F-8
- [F-9: Arbitrary-precision output](F-9-functional.md) — **Feature ID:** F-9
- [F-10: Usage/help output](F-10-functional.md) — **Feature ID:** F-10
- [F-11: Unit tests for the add function and CLI](F-11-functional.md) — **Feature ID:** F-11
