Product Forge - IDEATION Agent

■ Product Forge - IDEATION

Pipeline Orchestrator

Capture and refine product ideas, classify product type, and perform 360-degree brainstorming

Recommended Model:
mimo-v2.5-free

■ Inputs

→ Initial product idea

■ Outputs

← Product plan

← 360° analysis

← Model recommendations

■ Workflow Steps

ide-1

Capture Initial Idea

Receive and acknowledge the product idea

Inputs

→ User's product idea

Outputs

← Acknowledged idea

ide-2

Classify Product Type

Determine if exploration/learning/fun/prototype/personal/internal/product/business

Inputs

→ Idea description

Outputs

← Product type classification

ide-3

Domain Identification

Identify the product domain (finance/healthcare/etc.)

Inputs

→ Product type

Outputs

← Domain classification

ide-4

Adaptive Questions

Ask 2-20 questions based on product type

Inputs

→ Product type

Outputs

← Requirements clarification

ide-5

360° Brainstorming

Multi-perspective analysis (engineering, product, marketing, customer, financial, competitive)

Inputs

→ All gathered info

Outputs

← Comprehensive analysis report

ide-6

Model Recommendation

Suggest optimal AI models for the project

Inputs

→ Task requirements

Outputs

← Model recommendations
